PROJECT OBJECTIVE_: Sports Management

PROJECT DESCRIPTION:

This project is about organizing sports tournament in a college, where various teams are participating in three games namely cricket, basketball and chess. Therefore, the main objective of this project is to store the database of all the matches organized among various teams. Database stores all the values of three games(cricket, basketball, chess).

In the project assumptions are :

1. One player can play only one game.
2. One player can play from only one team.
3. Each team has exactly one mentor.
4. Player can exists without a team.
5. Individual player can play the games which are played individually such as carrom board.
6. In every game there exists a tie-breaker strategy.
